\*It is enable to use general outgoing cable type of proximity sensor with junction box, if plug type connector cable is used.

## ■ Proper usage

1. Junction box is only for DC power, do not use with AC power.
2. Be careful to use DC 2-wire and DC 3-wire type separately and NPN / PNP types are separated in DC 3-wire type.
3. Please be sure of correct wiring of power cable (Blue : -, Brown : +).
4. Green LED will not turn on when the power polarity is reversed.
5. Please connect signal line following the diagram and load must be installed when operating sensor.
6. Please check Red LED when operating sensor.
7. Please use protection cover or waterproof cover (P96-M12-1) on unused connectors.

\*The protection cover is attached on connection part of the box. Please be careful to keep this cover.

\*Waterproof cover (P96-M12-1) is sold separately.
